Hey Folks,

I am new ere, and probably won't be old here, but thanks for admission !

I have an old Kasino Concert bass head I was in the process of wanting to repair, but realized it was not something I wantaed to persue further, I do better tinkering with old Peaveys.

At any rate, I would like to see this amps or the parts go to a good home. My understanding is the components are the same as the Kustom 50 series.

I dont want to violate any forum rules, let me know if I am out of line.

Here is what I can tell you : The power section seems to be fine. The left channel board which seems to be best voiced for bass has output and good tone but has a very strong white noise in the background. The right channel board which seems to be better voiced for guityar, seems fine.

The case, tolex is worn but not beat to shreds. The amp seems to have been used, but not abused by some old timer for a long time.

Anyway, I will be gad to answer any questions, take pictures etc as to any interest in this old beast.

I know you don't know me I have tons of feedback on Ebay and Talkbass.com.

I hope someone can use the parts of this old beast, or would like it whole.
