How do you like the current classifieds setup? I am thinking of moving the classifieds from their own program into the webboard. Would that be any easier for you guys (and girls)? After all, this site IS for all of you, the only Kustoms I own are the PA columns I got from ET. :)

Oh, I also enabled HTML and BB Markup code for the forums, this lets you use emoticons, insert links and images into your posts, etc. Enjoy. :D

Hayden, don't move the classifieds! I like them right where they are--in the cascade head to the left. Thanks for all your work on the page!! Deb
