Hello everyone.

I have a Kustom 2x15 (Im assuming with CTS speakers) and was wondering what the wattage and frequency range are for them.

Also, did anyone ever find a modern speaker that is close to those old Altecs? I read a previous topic where folks were talking about it, but no one really found anything suitable. I messaged Eminence and they suggested two of their speakers that are used for pedal steel if I wanted to get the JBL sound, but nothing for the Altec.
