I am the new proud owner of a vintage Sidewinder cabinet that's in near perfect condition cosmetically, grille mesh, black tuck n roll, handles and wheels all excellent. It's been sitting in my parents basement for the last 30 years. Unfortunately, the head is missing out of the cabinet and the speaker appears to be damaged. I'm looking for parts to repair or I will entertain offers for the cabinet only if someone is really hot for this old gem. Anyone got parts? Help!
