I've got all of the other parts for my Kustom Sidewinder ordered, but I'm having a hard time finding this power amp transistor.

Q5 - Kustom part no. 007-0012-00

So far I've have found that it's transistor 38737-40410 nte129 pnp driver

But anything I've come across looks nothing like it (it's the green one). Any ideas?
