Has anyone ever seen one of the "amplified lecterns" listed in the 1970 price list? I was just looking at that, and realized, I don't think I've ever seen or heard of such a thing. Was it like a small T&R combo amp with a mic stuck on it, or what?

I saw one once so long ago that I can't recall if it was a full height podium type, or a half height type that needs to sit on a table top.

I believe they were like a K100 pa head but with only one channel.

The first time we got together in Chanute there was one at the Country Club. (2009) It was the full tall podium. When we went back in 2010 it had disappeared. I haven't heard about it since.
