Hi, I came across an old Kustom k200 bass guitar, is there any way you can get me some info from it by the serial number? like what year it was made. The number is 2959. Thank you!

I have no info on guitar serial numbers, but the control pots will have a date stamped in there metal case.

Judging by the last digit of the number you posted I will take a educated guess that it was made in 1969.
