Just a standard on off switch, no LED lamps with a 1/4" male plug

I think you would want a two button footswitch with a stereo 1/4" plug, to be able to turn off and on
the reverb and vibrato of the B2 head.

pleat

Your right Pleat, I was pointing more towards making sure he did not get the type with momentary
buttons where the switching is handle by a relay or such in the amp.
