I've got a black tuck-and-roll piggyback K100-1 for sale. In good shape and works great.

I love it to death but as I'm not gigging anymore I figure there's a working musician and/or collector out there who'd be thrilled to have such a cool and classic amp.

Asking \$500. Based right in the center of Los Angeles.

FYI, I have also put the amp up for sale on Craigslist in LA but would rather sell to someone here who appreciates these amps for what they are.

If you're interested, email me soon!

P.S. - I do have pics but I'm having trouble uploading images here. Clicking the "add image" icon doesn't seem to do anything (in either Safari or Firefox browsers). Thankfully the amp works better than this interface! I can email pics if you're interested.
