Thank you very much! The people at Kustom were no help.

my email is [rdjennings335@yahoo.com](mailto:rdjennings335@yahoo.com)

The system was sitting in a barn for 10 years with the covers on. It looks almost showroom condition, the goldish sparkle is perfect, the grill cloth is excellent the horns are great. The only issues are the POTS are very scratchy, the blue lights for the on/off and Polarity switches do not work and #1 channel doesn't work. All other channels are good. It will be great to see the literature so I know what does what. The speakers are 2X15 Altecs and 2X15 Stock Kustom, they sound great.

Thank you again and any information is appreciated.
