Yo All you Old Kustom Bubbas,

I Been hiding and playing alot this last year and starting to get as old as ED!! Yo Ed What's up? Got a serious Kustom stable of 2Many amps and the old 69" K200B-5 is still as sweet as ever. I show it off every time someone visits my studio/shop.

However I just got a Kustom KM-2 Microphone off eBay.

Can't find any specs? Any of yous guys ever use one of these mics? I'm guessing it's just a Kustom Ohio China Cheapo!!!

Any Thoughts or Knowledge of these Kustom mics ?

Smoke1 \$ Drink2

Is it a chrome grill snow ball type mic with a screw on cable connector like in the second to the left catalog set of pictures in the k200 literature section on this site?

If so, its a unidirectional mic and will feedback like hell if used for PA use, if its not a snow ball, thsn yea, its a china mic!

No, None of that, It's got a black screw on cover. I opened it up yesterday. Seems heavy duty & built solid. Looks fairly new and foam inside is clean. Will test it out tomorrow. For \$12 beans I can't complain and it can be a toy for the grandkids if it doesn't work out if nothing else. Thanks Steven

More like Desinged in USA, make in China, shipped back to USA, shipped out of Kentucky, then cursed at that it was made off shore!
