This monster Fender 400 ps 435 watt minimum tube amp is for sale.

It is in great shape and will get you in shape moving it around as it weighs in at 90 lbs.

These amps are like a giant twin reverb with a bass channel.

The 4-12 bassman cab is factory loaded with Gauss drivers and is in good condition also with the grill cloth having the normal some what light brown tint to it from use.

The cab is on factory casters.

The amp has been modded with two 4" box fans on the rear vent panel that could be removed, but output tube life is greatly extended if you leave them on.

The selling price is 1k for amp and cab, and you pick this piece of history up in upper Westchester county NY, no shipping!

To interested buyers I will email pictures.

I can not be reached by email on the week ends, so please call

914 420 4356

Thanks Steven
