
Subject: Looking for the hooks to wind the power cord up..

I've had 'em on my Kustom Heads, but I'm restoring a powered 2X15 cab (the one with the power module), and it has a really long cord. It appears as if there were some cord winding hooks on the back of the cab, but they were not present on the cab when I bought it. The screw holes are there, and the impressions from the brackets, but no brackets.

Anybody have an extra pair?

Thanks!
