Hi, is anyone looking to sell colored (please not black) Kustom combos or a Red K100-2 head? I have a red 2 x 12 cab needing a head. Please let me know. Thank you...

I have a red K50 that has been converted from a single 12 self contained amp to a stand alone amp head that would fit on your 2x12 cabinet. Hadn't thought of selling it, but it would make a much better sounding amp than the K100-2 head. The K100-2 head is a single channel very bright and brittle sounding head. The K50 is a much warmer in tone and has reverb plus tremolo and vibrato with a pull bright switch. djt@chartermi.net and I can send you photo's and we can discuss price. Red's are pretty rare and seldom pop up for sale.
