mailto:gruvola@msn.comHi,

I pulled these out of a non-tuck and roll 2x12 a long time ago. I used them in an other cab and they worked great. They've been hanging on my basement wall for years. Love to see someone on this forum put them back to their proper use.

don't know if this link will work but they look just like this one I found on Ebay:

http://www.ebay.com/itm/1971-CTS-12-Ceramic-Magnet-Guitar-Am-p-Speaker-w-Aluminum-dust-cap-/290744112699?pt=LH_DefaultDomain_0&hash=item43b1b3163b

I did the 9v battery test and they seem to work fine. Make an offer. Paypal should work to exchange funds.

Thanks
