Recently I had a speaker go out in my 2x15 (1967 K200A-1 T&R) cabinet upon letting the bassist of another band on the bill borrow it for their set (big mistake). It couldn't be reconed (magnet had shifted or something, coil was jammed), so I replaced both speakers with new Jensens because (a) I guess it's good to get a matching pair, and (b) my guy told me that would be the closest thing to how the cabinet sounded new, so I was like hell yeah.

Anyway, the speaker that died was an old Jensen that was apparently put in at some point in the past to replace one of the originals. But the _other_ one is a CTS, one of the original in the cabinet, and still totally good. Could be used as a replacement in a similar cabinet, or for one of those Kasinos, or whatever. Super nice speaker. Anyone want it? Say, \$75+shipping? I'm in Des Moines, IA.
