I have the pair of H/F horns from a 1595 Combo. They were originally matched with the 15" JBLs. Good working condition.

Are they 10" or 15" horns. If they are 10" I may be interested. I have plenty of spare 15"ers.

Hello Sunnhead (My brother had a Sunn amp back in the day)Long story not so short. I was given the combo not working about 20 years ago. I stored it for a short time, and eventually took the speakers out and the cord hooks off(they now hold MC helmets inside the shed door). The combo got tossed. I tossed one nonworking JBL(sorry) and soon gave the other to a friend to resurrect. The horns went onto a wall in my dry shed til a month ago. The wife asked about them and I really had no good answer, so I hooked them to my little ROSS Fame 25 to test them and they passed the audition. Now they need to find a home. I had an offer from Tulsa for \$40, but I asked for \$50 plus the USPS wanted \$19+ to ship, and he faded away. Are they something you could use?

I did respond and PM him first, but I will let Carl and diapers fight over it, as he has my offer.
