Hello again got my biggger transformer built

but need to know exactly where to buy the bigger spl drivers & 2mailto:b.billings1@yahoo.com mail filters . I dont know squat about parts so I need dealers and PART NUMBERS so I can order them.

thank you very much Kustom Pros.

hello I have a kustom 4 250 I want to use for bass

I had a FIVE amp power transformer built

the Low b notes sag on my amp but the tone is GREAT and of course the boost opp its great and the very tone makes this a FULL tone bass and highs I need to know MEMBER STEAVEN where to get these other parts you say to get the company and the part numbers from the catalog thank you very much the parts you said mail filters 19.990 to 15.000uf and spl drivers

the main filters you need are from Mouser electronics.

The part number is 75-3gy103f100cb2a, be ready for the price as these have gone up to 65 bucks each!

The speakers I would suggest that will not kill your wallet are from parts express and there are two set ups you can go with, one is order two of part number 290-417, or better but more expensive would be 1 of 290-417 and 1 of 290-460.
