For sale is a K100 -1 chassis that I have installed the complete power supply section and power output section from a K200B head.

The amp is now 100 watts rms into a 4 ohm load.

The head is in great shape but for a crack in the upper left side of the plexi face plate which looks like a scratch far more than it looks. Like a crack!

I have photos I can email you should you like.

The price is 300 firm and you. Pay the shipping.

Interested party's should pm me or call evenings EST.

914 420 4356

Steven.
