Subject: What is the "correct" cloth for k100 kombo?

Hi all -

I'm looking to replace the grill cloth on my k100 4 x 10 combo.

I've searched for a clear definitive "this is the cloth you need" statement but haven't found one.

Can anyone state definitively what it should be and provide a source?

Thanks very much!

-Red

http://www.guitar-parts.com/catalog/black-grill-cloth-0 Labeled Fender Black grill cloth, but it is the same cloth that Kustom used on their amps before they went to the black with the silver threads in the cloth.
