Hello- Long time since I've been on the board and hope this is in the right place and if not, the moderator can move it where it needs to go and please accept my apologies.
I have a Kustom 2X15 cabinet loaded with JB Lansing speakers (all original I believe) and the plate at the bottom of the cab says 'D-130F'. Does anyone know if these are guitar speakers or bass speakers ? Can't seem to find anything in the 'Literature' section on D-130F's, I only see D-140's. Any help would be greatly appreciated ! Thanks in advance.

If I'm not mistaken, the D-130's were guitar speakers and the D-140's were bass. You did score some nice speakers.

Iowa Boy is correct - guitar.

Between those and the ALTEC speakers, they are the best sounding in a Kustom for sure.
