Does anyone know if a tank from a K-250 will work in a K-200, K-300 or K-400 head?

It will not work in the K200, but the others you listed it will.

I don't think the reverb tank from a K250 era amp will work in a K400 series as you asked about in the original post.

Sorry about that, yes the 400 uses the same tank as a 200!
