Thought I'd put the word out.....on Craigslist in Detroit Mi. a guy is selling a big K bass cabinet with 4-15's. He claims they are the original speakers and they all work. Pleat says this unit weights about 180 pounds. He's only asking \$100 and speakers alone are worth 3 times that. He won't sell speakers alone, so if there's anyone in that area that wants a cheap bass cabinet look it up.
