Thought I'd share with our members. There is a seller in Norwalk Iowa that has a Kustom PA for sale: \$750 includes 2 big 15 inch cabinets 2 Kustom XII, a mixer, and some Kustom and a Peavy horn. I tried to buy the equipment at a reasonable price but they are unwilling to let you test the equipment.....your buying it all as is. Was told there was some issues, but guessing it is a lot more since I got them to come down quite a bit in money. I have a feeling that none of it works and that is why they won't let you test it. Thought I'd just pass this along since I would hate for someone to get burned on a bad deal. The posting is on Craigslist Des Moines Iowa.

Seems the buyer has now changed his mind and is willing to let the equipment be tested. There IS power in our membership. We do have a voice.

I hope that other members also will post on here when they run into something that seems a little shady or not right. The last thing I want to see happen is Kustom getting a bad rep or one of us getting burned by some con artist. Lets all watch each others back.
