I've had this for about 9 years now, and since I haven't been in a band in about 3 years it's time to let this go. I want this to go to a player but Guitar Center is just down the street and I don't want to see it sitting in the corner anymore.

Asking \$600. I am located in Oklahoma City. Pictures are available, but since I haven't made ten posts I'm unable to upload them here.

You'll be lucky if Guitar Center even gives you half that price. You'd do better listing it on Ebay or Craigslist. If you want to give it away, then sell it to Guitar Center. Do you have the foot switch? What color?

No, I don't have the foot switch. I didn't know they came with one until I found this site the other day. Color looks to be kind of a white/gold color.

I really don't want to sell it, but I have to. I'm open to offers, I want it to go to someone who'll actually use it.

It's a bass amp more than guitar, with no effects other than selector switch. Thought since it had the horn it was the guitar model. Original color was metallic silver. UV has oxidized the material. Try using a good quality car wax and it might bring back some of the original color and remove some of the yellow.
