I am new to the site, I recently purchased a Kasino U200. I would like to find a vintage footswitch. Could someone tell which Kustom footswitch was used for this amp and what was it's function. Bouncing around the internet I see vintage Kasino 1 button, 2 button, 4 button footswitches. Thanks you

If your amp is the U200-P PA amp it would use a single footswitch to turn on and off the reverb. If your Kasino amp is a guitar amp, it would still use a single footswitch to turn on and off the selective boost circuit.

Thank you, it's a guitar amp.
