Just found a lonely 150 and cab in black to add to the fleet.
Needs bulbs -of course!
The head is #105727 mid '73 I believe. The cab is #36316 and says 2-12-G
What did the G stand for? It has 2 Celestion G-12T-75 16 ohm in it now, I just peeked.
Now I have four colors....collection...obsession....addiction.....wheeeeee

The 212G is a guitar cab that would have came with 12 ohm KEI (Kustom Electronics Inc) speakers. So your cab with 16 ohms wired in parallel is a great match since the K150 amp head is 8 ohm total load.

Thanks for the info Pleat.

So far the gang consists of;
'73 150 head and cab in black
'70 K-25 in cascade (killer)
'73 300 PA and speakers in charcoal (wee bit o'weight)
'65 Frankie and cab in silver (sweet)
