Subject: Kasino "Natural" Bass Amp Speaker Question

Hi guys,

I just picked up a second Kasino Natural Bass Amp, in really nice condition. First, I have a "general" speaker question. This is designed for an 8 ohm 15" speaker. Someone replaced the original with a Sunn 16 ohm speaker. What effect does this have on the amp, is it harming it at all, or just reducing the output power?

Any suggestions on a good, reasonably priced replacement speaker I could pop in there?

Thanks!

Gar
