I need a 10" CTS speaker with the aluminum dust cap.

Thanks
Steve

There's one up on eBay right now (seller tony5130) but you will have to cut the as manufactured VC cover off it and get the needed replacement from Weber and glue it on.

That one is a much lower wattage speaker than what I need for a replacement. But thanks for giving me the info. The one I need is below

Steve

I was checking here in Denver and to keep the original looks it is much cheaper to recone the original speakers. Cost is around sixty bucks for a twelve inch speaker !

I can't recone if the magnet is missing. That is the big issue. The speaker I have shown is the good one. The bad one the entire magnet is gone.
