SOLD !

I have here in Colordao a pair of CTS columns and the PA head which will work for anything. All in really good condition and silver in color the panel is so shiny it is hard to photograph because of reflections. Everything works even the pilot light ! Controls are quiet and not scratchy sounding. It has been sitting in the back of a closet since the mid eighties but still has the original punch and volume it had from the jump. All original speakers and sounds great. Has a little wear but for fifty+ years old it really is in good shape. If interested message me in here as I am new I am not really shure how to do much on this site yet ! Asking \$500 i have pix but do not know how to post them ! To the modrator, if I did anything wrong please let me know so I can fix it THX !

Doug
