I've had this KUSTOM VIII MIXER for quite a while. I originally got it while working at a local sound company where I was building staging and cabinets. Probably got it on trade or for free, I don't recall.

In the past I've used it in a basement rehearsal situation for a quick and easy plug/play piece. I recall that the channels were crisp and clear and the line EQ was remarkable.

In any event, if anyone has interest in this piece let me know [dezmoduo at g mail .com](mailto:dezmoduo@gmail.com)

Its a stereo mixer. Push button stereo/mono switch (Like it matters!!)

Model: VIII-RM

Serial#:K17268

Only one control knob missing and one Pad slider switch damaged.

All the best for this new year.
