For those who are Kustom buffs. I'm looking to decorate the stage with some cool Tuck & Roll gear. I have 2 of the K100's with 15" cabs (Red & Blue) already but, would like to have a few of the "tall" boys to match. If I could get a bit more demanding by asking for a "White or Gold Sparkle" and then a "Black". If any of you have sources, that'd be much appreciated.-- Again, I know it seems sacrilegious, but these are only for the 'decor'. We actually have a full direct system where the guitars are processors to the console. (I know, I know...)

Thanks Jon

CCR only had black and they were K200A series amps, but that being said the A and Bs look much the same.

these are all over fleabay all the time, however, I have found almost all I can find are up north or east, some in cal. but mostly north and east.

Most won't ship either.

I have a black one (b model) and the guitar version with reverb, trem and vib. I play through the 2-4x10 p.a. cabinets, and a 2x15 and a 2x12 (trt series...have the 50 watt head, too).

Anything I use to drive those cabinets (the 2-4x10), rocks, including marshall 100, 50 and 20 watters, and my 59 bassman.

It was hard to find them in my area. However, all are mostly pristine, including handles.

I have been trying to find a 3x15 horn loaded jbl cabinet.

Again, north, east and california. and no one wants to ship.

I figure if I really want one, I'll go retrieve it, bummer.

I have a bunch of Kustom stuff that will probably meet your needs. I know I have at least one K200B-4. w/rev. trem, vari-boost, and harmonic clipper. I may have two.

I'm in northern NV but can deliver to NoCA Sac area. I will ship heads, but not cabs.
