Selling my vintage Kustom two button footswitch. This is a harder to find 2 button switch which controls reverb and tremolo/vibrato.

It will work with any vintage Kustom amp that has a 4 pin footswitch out.

This footswitch is in good condition. It is a vintage item and shows some moderate signs of wear and tear, but both switches work as they should. Both sides are dimly lit when in the "off" position, and become bright when engaged. I've been using this with my Kustom 250 guitar head, and works beautifully.

Asking \$75 OBO.

I have photos of it, but can't figure out how to include them in the ad.
