This sweet little Kasino rig has joined the other Bud Ross members of my family as of 10/1/17. Very little specifics that I can locate and would be interested in what some of the things do on this head. Would love to hear from you. Thanks.

What do you mean by " things to do on this head", is it having issues?

That' U 100 is a K100 without the T & R!

I'm actually interested in rear amp panel usage. I inadvertently posted a new post rather than reply to this. Please look at it for details.
