I can repair this amp, but is it worth my time.
anyone have any specs on this amp?

it is a kustom 2-15J-1

never seen one, until now

any info is appreciated

Your amp for sale is a K200 A -1 series 100 watt RMS non effects Head, and there's nothing in it that could not be repaired or replaced if need be!
The 2-15j designation means it was sold with a cabinet loaded with 2 15" Jensen guitar speakers model C15L.
