Hello and welcome!

The K300 was a pa head and as such Kustom never made a cabinet as wide as the head itself if that's what you are looking for?

These Heads either came with two narrow cabinets having 3-8" and 2-12" drivers ,or two cabinets each containing 2-15" drivers and a Altec Lansing type metal horn.

Is the second type of cabinet I listed here what your after?

These PA systems can be viewed in our literature section on this site's main page.
