Early 1970s Custom K-150 combo amp for sale. Condition is OK, a little rough, but face plate and sound are fantastic. Original speaker from 1972 intact and works well. Cleaned and ground plug added in 2009. I replaced the wheels around that time and it rolls well. Sounds great - very punchy.

Model: Kustom K150-6

Serial: 77343

Color: black

Style: dual channel/combo amp

This is most likely for a bass guitar/keyboard - I had used it for bass. All the "leather" is basically intact, with a rip on the back side. There are a few blemishes here and there.

I am in New England, North East, in East Greenwich, Rhode Island. I will try to send pictures if you anyone has interested.
