Just seeing if anyone who may be in the Northeast Oklahoma or Southeast Kansas are may have a stack they are ready to sale. I know someone whom is interested and has a top price of around \$500, So shipping it isn't really an option he would need someone somewhere around our area. I was going to sell him my black 200 with 3x15 but the who rig started acting up and I can't get it ready for him. If anybody in the area has anything I would just directly put you in contact with him so that I have nothing to do with the transaction I'm just trying to make up for not coming through with the amp on my end. Thanks
