Hey guys... wondering if anyone has ANY info on this amp. I can't find anything online...anywhere. I need to build a footswitch for the 4pin rear jack... and potentially recap it... which won't require a schematic. It'd be great for the footswitch though! Thanks for any help.

Hello!
I am totally at a loss for what model your are posting here about!
Is this amp a piggie back type with a plexiglass face?

The K200A series amps used the 4 pin XLR jack. Shorting each pin to ground turns on the effect. The latter Slant face K250 series used a 6 pin XLR jack.
