I have a K100 with a blown power supply. I don't want to bother troubleshooting and repairing, so I'm parting it out. Speakers are sold. I used the PC1400 board to fix another K100. I'll take offers on any of it or all of it.

I have:

1. the cabinet (black in exc condition; don't really want to ship)
2. the handles (exc condition)
3. the 1500 PCB (works as far as I know) SOLD
4. the reverb tank and mounts (works fine)
5. knobs
6. panel face plate is good (small chip in corner but covered when mounted in amp)
7. chassis carcass including transformers and PC900 board (probably needs work)
8. the bad PC1400 board from the other K100 (needs work) SOLD
9. the casters (gold color, good cond, but appear to not be original)

Everything is gone except the cab itself.
