I have an early 1970's 250-4, with all 3 original foot pedals. The cab is the 2-15 + 8" horn. Black T&R is in excellent shape. Includes cab cover! A little surface rust on handles and rollers.

Head was in the local shop. They replaced a few diodes, etc. But they could not find a mosfit transistor for the preamp side. Needs a FS85677. Any repair experts might be able to find something that works. Or if you have a working head that the T&R is ratty, swap out the insides?

I can email photos if you are interested. jwaydula@gmail.com I see similar cabs alone on Reverb etc. going for $500+. Considering the foot pedals, etc, I would like to get $600.

Located in MN near the Twin Cities.
