I'm looking for foot pedals (four button & wah) for a K250-4 amp
I'll probably try to build them if I can't find the originals but I'd rather
have the 'real thing' if I can find them. That amp is kinda rare
so it'll probably be a miracle if somebody has them. I can't
pay 'antique road show' price for them though. . .I'm not a
collector. . .I'm a player!
