Looking for just the JBL cabs W/HF driver (high frequency horn on top of 2X15's preferably the JBL D130f's)

I got the K250-4 head recently and now I'm looking for a single cab with two fifteens and an HF horn mounted on top.
I know I'm dreaming but I know they're out there somewhere. Even if the cabs don't have speakers in them
i'd still be interested. In a price list I saw here the whole rig was lited as x2L&1H if you're into numbers
