The (2L) part of the designation refers to two JBL 15" D130f's
The (1H) part of the designation refers to one Altec HF driver

I have a K250-4 amp already so I'm looking for a black T&R cab
with or without the speakers in it. It has to be the right
cab though. . .deep enough to fit the Altec horn. I play
electric piano through this rig so that's why I need the
top end clarity with the Altec horn! Even if you just
have the a tall black T&R cab (the one that went with
this speaker compliment only) then I would buy that.
If you have one WITH speakers. . .even better!

Just a heads up I use the 250 with 2x15 plus horns and the powered cab with my Wurlitzer...
massive sound
