Looking for what is a good replacement or what others would use. I have searched but no luck.
Looking for vendor who would carry this. Thanks

I have no idea as to where you might find one other than from a salvaged preamp board. I will check to see if I have one in my parts box.

But, before we go there, what is wrong with the one that you want to replace?

I have a cts panel mount pot coming to put it back together. Thanks for the offer. Plus I just picked up an as is head. Do you have any face plates you want to get rid of?

Sorry, no faceplates. I did see one on eBay.
