I have some parts from a K200 that have used for parts. Both preamp boards, power board with some parts missing, new 3055 transistors, chassis with painted front panel, head cab black in ok condition, power transformer, bridge rectifier. Lot of new parts on power board resistors, capacitors etc. I can be reached at 4802177580. Amp was made in 69. Thanks

I am definitely interested in the power board for sure, as well as any other parts that you might have. Could I please see some pictures?

I have a 68' Kustom 200 bass amp that I need a 2 dot knob for. I am willing to buy more than one if need be. Let me know. Thanks.

Sorry I didn't get back to anyone that responded. I was having some health issues at that time. Looking to get rid of all of it now at one price. Thanks
