I built a custom Kustom speaker cab with two JBL D130f's and a HF driver. Originally I bought a K250-4 amp to drive it. I sold it. Now I have the speaker but no power. If I could get one of those power modules (KPN 200-0167) then I could use a line out signal from one if my other amps to drive the column spkr. Meanwhile, it's dead in the shop.
